FITTING INSTRUCTIONS

- Remove the OEM bar end by removing the bolts and replace with the R&G bar end kit.
- Locate the bolt through the bar end cap, with the countersunk head of the bolt sitting in the countersink of the cap, then position the stainless metalwork onto the exposed end of the thread.
- Offer up to the end of the bar and tighten the bolt into the threaded boss within the end of the bar.
- *Please note - the smaller diameter of the stainless metalwork sits against the end of the bar. This is to allow clearance for the grips and throttle.*
